- PS1

Skills

- Problem Solving
- Fast Learner
- Time Management
- Communication

About Me

Aspiring Software Engineer with growing experience in web development, automation, and low-level computing. Passionate about teaching beginner-friendly programming and currently studying at SMK TI Bali Global Denpasar.

Project Experience

Rabigames

Interactive Game Studio Website

Built an animation-focused website using Next.js, TailwindCSS, and GSAP. Designed smooth, playful interactions and clean UI components to mimic a modern game studio brand.

MaiShell

Custom Windows Shell

Built a simple custom shell in C with a minimal command parser and dictionary-based command dispatching. Added basic commands and playful terminal interactions. Currently expanding it into a more complete CLI environment.

Tools I Built For Myself

Custom PowerShell Environment

Customized PowerShell with dozens of personal functions (search utilities, TikTok downloader, VSCode theme switcher, process manager, and terminal welcome script). Built a productive environment using aliases, custom commands, and shell scripting.
